Congratulations!

This report will show you exactly how you can profit from the online casinos and beat them at their own game.

It's NOT complicated, and you DON'T need a degree in mathematics or statistics to profit with this system. The instructions are so simple and easy to follow that even a six year old could play and still win (provided, he had his Daddy's credit card to sign up in the first place! ☺)

But seriously, the only thing you need to do is follow the instructions EXACTLY. It's extremely tempting to be greedy with this, but that is the worst thing you can do. This is like a "recipe" for winning, if you don't follow the recipe, something is likely to get burned ... your wallet!

If you do exactly what you are told, then you will be able to generate hundreds of dollars in winnings every single day – Just like I have.

Below is a screenshot showing the various deposits I've got into my bank account over the past couple of months. As you can see, it's a nice chunk of change – **Over \$23,000 in less than two months** ☺. This system works!

Are you ready for your bank account to look like that?

Then Let's Get Started Shall We?....

How To Make \$200 In Just 10 Minutes – Guaranteed!

Ok, first of all, I'm going to give you a couple of rules - for your OWN good.

- 1) You must follow these instructions exactly.
- 2) You **MUST** follow these instructions **EXACTLY!!!**

I really want to stress this point. The whole idea of a "system" is that it is a plan to follow. If you don't follow it, then you're just another gambler throwing money down the drain...and I know you don't want to be that! I want you to read through this document the whole way before you get to any betting (and winning). This book is not very long, and the tiny effort you make now will be worth hundreds if not thousands to you in the future.

As you may know roulette is a game based on odds and the law of averages. The casinos know this – and they know how to use those laws of averages to their own benefit. What we've done here, is turned the tables. We're not breaking any laws of averages, we are simply "manipulating" them to our own advantage.

Once we know how to do this, we pretty much guarantee that we'll win every single time we play. Pretty cool huh? 😊

With that said, this system has been tried and tested to work for a specific casino. Every casino online is different and uses various algorithms to determine their 'random' outcomes. For that reason, we **STRONGLY** advise that you play this particular casino. You cannot blame us if you go to another casino and end up losing your hard earned money. Stick with what works!

Step #1 – Download The Software

FOLLOW THIS LINK TO SKIP THE DOWNLOAD STEP AND PLAY INSTANTLY:

<http://www.EZ-Casino.com/instant.html>

The first thing that you need to do is download and install the software so that you can play at the casinos. Don't worry, this casino is the largest in the world, and all the software is verified safe to run. We run it on our machines after all.

Click Here To Download The Software

If clicking that link doesn't download it, copy the following link into your browser:

***** Important Note For USA Players *****

If you are in the USA you won't be able to use the casino software above, unless you are from New Jersey. For the rest of USA players, you are recommended to use the link below as this casino will accept players from the USA.

For USA Players Only: <http://www.EZ-Casino.com/usa.html>

You should see a box like this or similar. You will need to click "Keep" or if using Firefox you may have to "Save" to your desktop and then launch the file.

If you get this window, just click "Run" to start the installation.

Please wait while the files are being downloaded

Click the "Next" and "Install" buttons to install the software.

Next, you need to register yourself as a new player under the following screens:

Choose "Yes" if you get the following window, then click on the "Deposit Now!" button (or choose "Play Now" to practice and get confident with LazyCasinoProfits system, remember that you won't risk your own money)

NOTE: For US players who want to take advantage of this system, you should use the casino below.

For USA Players Only: <http://www.EZ-Casino.com/usa.html>

Casino's Lobby

Once you've logged in, you'll be presented with the main casino welcome screen. The first thing you need to do is click on the "Cashier" at the bottom left of the screen. Follow my instructions and I'll show you **how to play without risking any of your own money!**

Click on the "Deposit" button that appears next. This will allow you to add funds to your account.

Here is where you can play without risking any of your own money....

When you sign up to the casino, they will give you a bonus of 100% of your first deposit up to a maximum of \$200 (About £132 at the time of writing).

Why would they do this? They do it to entice you to put as much in as possible, thinking that you're just like every other fool who is going to end up losing a lot. However, we know different...

I strongly advise that you deposit \$200 into your account so that you can get the maximum \$200 bonus. That way, you can use the bonus money to start you off and keep YOUR money absolutely safe!

You NEVER have to risk your own money and can later withdraw it. So the best approach to take is depositing \$200, play with the \$200 bonus and then in the future withdraw your original stake with all of your winnings.

(If you cannot afford the \$200 just yet, we recommend that you put in at least \$100 (~£53). You want to get as much bonus money as possible to play with initially so it is well worth doing it now. You only get a 100% bonus on your first deposit.

If you are making the deposit with Paypal, use this link to have your bonus:

<http://www.EZ-casino.com/paypal.html>

*Note: **For US players**, it is impossible to use a debit/credit card. Click the "NETELLER" tab instead. On the next page, there is an option to signup for a NETELLER account which you can fund using your Visa card or from your bank account. You can then make your deposit from the funds within this account!*

Now, with the \$200 bonus deposit you can play using the LazyCasinoProfits system 100% risk free. If you do make a mistake (i.e. you DIDN'T follow the instructions) then you still have not lost a single penny of your own.

We recommend that you leave this \$200 in your account as the casinos look more favorable on accounts with money always in them, and in some cases this can help you get much further in beating the 'system'

Now let's move on to the good stuff. How YOU can beat the system....

How To Make Hundreds A Day At The Roulette Table Following This “Idiot Proof” Formula!

Here is where the system starts to work.

Once you’ve made your deposit of \$200 (or at least \$100), you need to click the “Roulette” option on the left of the Lobby screen.

Choose a “French” table, it has better odds.

Remember, the secret is not to be greedy – that’s exactly what they want you to do, and that’s exactly how they make their money. Follow the rules and don’t be a fool! 😊

This system utilises the High – Middle – Low style of betting to start off with a low bet and then build up to a much higher level. Rather than betting on a single number which gives you a 1 in 36 chance of winning (not good!) this system gives you a 1 in 3 chance of winning.

BUT we are going to use this method in a certain way that we can dramatically increase our chances of winning.

First you need to understand how the table looks like....

There are three sections that you will be betting on – the High (3), Middle (2) and Low (1) sections as indicated on the screenshot above i.e. the 1st 12 numbers, 2nd 12 numbers and 3rd 12 numbers.

For the Low section, any number between 1-12 will give you a win.

For the Middle section, any number between 13-24 will give you a win.

For the High section, any number between 25-36 will give you a win.

By betting normally on these three sections, the odds are 1:3 meaning that if you want just to break even, you have to win at least one out of every 3 spins.

However, by using this system correctly, you will increase those odds in your favour so that you will only need to get one win out of every 17 spins. The law of averages says that you should be able to get over 4 wins out of those 17 spins!

If you don't comprehend it yet don't worry, here is how you play it. Just follow these guidelines.

- 1) As a new player you can spin the wheel without betting yet.
- 2) You need to look for a specific sequence in the numbers when one of the High, Middle or Low sections has not come up for 7 spins. You do NOT bet until this happens. i.e if you spin the wheel seven times and only get numbers between 15-36 then this means that a LOW number hasn't turned up for 7 spins.
- 3) The odds of one number not turning up for 8 spins is over 1:25 meaning that 24 out of 25 times you WILL get the result you want – in this case a LOW number. So NOW is the time to bet on the LOW section.
- 4) You must always use this technique and ONLY bet once there has been a gap of 7 spins without a certain type of number coming up. So don't get greedy.
- 5) Now that you know it is SAFE to bet, you need to know HOW to bet. To bet a certain amount, click on that type of chip e.g blue \$1 chip and then click where you want to place it on the table.

Bet Number	Your Stake	Your Winnings
1	\$1	\$3
2	\$2	\$6
3	\$3	\$9
4	\$4	\$12
5	\$6	\$18
6	\$9	\$27
7	\$13	\$39
8	\$20	\$60
9	\$30	\$90
10	\$45	\$135
11	\$67	\$201

What you do is this...

Start off at bet number 1 i.e. you wait for a 7 spin gap and then bet \$1 on the section that hasn't shown up for 7 spins.

This gives you \$199 in the pot, and \$1 on the table. A win will get \$3 back.

However, even if a bet doesn't win, do not worry. Simply move on to the next number for the following bet, and you will still win money. You don't need to wait for another 7 spins gap to bet again, just bet immediately after a not winning spin.

ONLY follow the bet chart if you lose the bet. I.E. you bet \$1 in the low section and a number 26 shows off. Then you bet \$2.

For example: If you bet \$1 for your first bet and lose, you are down \$1. So if you start with \$200, you now have \$199.

Next time, you bet \$2 – taking you to \$197 in the pot and \$2 on the table. If this one comes in, you'll get a return of \$6 making your total now \$203 so you've still made a profit, even though you lost the first round!

Even if that \$2 bet loses, you bet \$3 next time – giving \$194 in the pot and \$3 on the table. If you win this, you get \$9 giving you \$203 total!

Even if you get to the end of the sequence and lose, it still doesn't matter.

Say you get towards the end and bet \$45 and lose... you will still have \$67 in your pot.

The next bet is \$67. If this one wins you get \$201, so you still make a profit!

Using this system, **you can lose up to 11 rounds**, but as long as you keep increasing your bet each time **you will ALWAYS make a profit!** Now can you see how powerful this system is?!

You have just manipulated the law of averages to give you a
MASSIVE advantage!

There are a couple more pointers that you must consider:

- 1) Never spend more than 30 minutes at the same table. After this time, the tables seem to get harder to play. Don't ask me why! Nevertheless, the best thing to do is exit out and start again on a 'fresh' table.
- 2) Do NOT get greedy – You HAVE to be disciplined and follow this system. Any deviation and it can go wrong, but stick with it, and you can easily generate \$400-\$500 in just an hour or two of playing.
- 3) If at any time you're not comfortable with the way things are going, just quit. There's no point going bankrupt if you have one bad day. It's better to leave and come back again later.

Here's a quick review of what to do:

- 1) Click on the link below to install the software and click "Money Play" to set up a new account:

<http://www.EZ-Casino.com/download.html>
- 2) Use the "Cashier" function to make a deposit. Use Debit or Credit card for instant funding. (US players use the NETELLER function)
- 3) Deposit \$200 to get the maximum \$200 bonus. If you can't afford this, make sure you deposit at least \$100 to make sure you can start playing with bonus money and therefore, keep YOUR money safe.
- 4) Choose the Roulette table – a private french table with standard stakes.

- 5) Spin the wheel without betting until one type of number (High, Middle or Low) hasn't turned up for 7 spins in a row.
- 6) Start betting \$1. If you lose, bet according to the table above. If you win, start over from \$1.

That's all there is to it! It's incredibly simple, but like I said, you have to be disciplined and stick to it. Using this system you can lose up to 10 times in a row, but so long as you follow it, you will always end up with a profit.

As a final note, feel free to give this report away to any of your friends, family or contacts whom you think will benefit from this. This book was written to help "The Little Guy" like you and me beat the big casinos.

Once you've put this system to the test you'll want everyone else to experience the same success that you have.

The only restriction is that you must leave the content intact – do not change it, or you could end up giving someone the wrong information!
